COWBOY ACTION SHOOTING™
SASS Range Operations Basic Safety Course

INTRODUCTION

The design and production of this course has evolved from many years of running matches and a need for match to match consistency. Shooters at all SASS matches will benefit greatly by the consistency this course provides. This course material is designed to help clarify and interpret the SASS Handbook. This document may be copied by any SASS Affiliated Club for use in the SASS Range Operations training program.

SASS encourages the broadest dissemination of this material to its members as possible. Those SASS members who receive this Range Operations Basic Safety Course training, taught by an instructor who has passed the Range Officers Training Course (signified by an orange pin), and who subsequently pass the Range Operations Basic Safety Test will be awarded a yellow SASS pin as evidence of satisfactory course completion.

Consistency is important—undefined rules and gray areas cause hard feelings,
misunderstandings, and arguments.

The purpose of this course is to ensure safety and consistency at every SASS club match, no matter what size the match. Each SASS competitor who sets foot on a range is a Safety Officer, responsible for his own safety and the safety of those nearby. It is our intent every SASS competitor has the knowledge to function as a Range Officer, given appropriate coaching on the range by experienced personnel.

The Range Officer's role is to keep the posse running efficiently, safely, and consistently. It is the responsibility of club officials to determine the qualifications, experience, maturity, and judgment of its match officials and appoint appropriately trained individuals as Range Officers for their matches.

The rules and disciplines described in this course will not impose any undue hardship or additional financial burden on any club. It will, however, train our members to be safe and consistently penalize unsafe gun handling. Shooters who travel to SASS matches or clubs will feel comfortable knowing the safety rules and procedural penalties are consistent with their home club. They will also feel comfortable knowing the scoring, guns, and equipment are consistent with the SASS Shooters Handbook.

All SASS Range Officers must know and understand the most current version of the SASS Shooters Handbook, be informed, and understand any recent changes. It is recommended all posse leaders be trained in this Basic Range Operations Course. As of December 7, 2003, successful completion of this course, as well as the Range Officer Training Course, became required in order for a person to hold the position of Territorial Governor for a SASS-affiliated club. We must keep in mind what firearms are designed to do, and remember they can be very dangerous and deadly unless great care is taken while handling and shooting them. **We must always treat every firearm as loaded and ready to fire!**

COWBOY ACTION SHOOTING™
SASS Range Operations Basic Safety Course

SPIRIT OF THE GAME

Good sportsmanship best defines “the Spirit of the Game.” When designing and running a match, every match Director and Range Officer must keep in mind the event is solely for the safe enjoyment of the shooters. Range Officers must be professional, polite, and friendly. The SASS Shooters Handbook is to be followed in designing a match, and SASS rules enforced equally and consistently. These rules have been developed over time and provide our sport with a high level of safety and consistency. This course was designed to give you a better understanding of the rules and how to apply them.

Completion of this basic safety course shows your commitment to SASS and demonstrates your willingness to jump in and help out where needed on your posse.

Because our goal is to provide a safe and fun shooting experience, any competitor or Range Official who uses foul language or becomes belligerent or threatening in any manner will be disqualified from the event, and, at the Match Director’s discretion, may be required to leave the range.

FAILURE TO ENGAGE

A “failure to engage” occurs when a competitor willfully or intentionally disregards the stage instructions in order to obtain a competitive advantage and is not assessed simply because a competitor “makes a mistake.” A Failure to Engage applies only to non-shooting situations such as refusing to rope a steer, throw a stick of dynamite or otherwise make an attempt to complete any other non-shooting procedure written within the stage instructions. In such a case, in addition to any penalties for misses, a 30-second failure to engage/Spirit of the Game penalty is assessed.

SAFETY RULES (FIRST, LAST, AND ALWAYS)

All competitors are Safety Officers.

Our sport, by its very nature, has the potential to be dangerous, and a serious accident can occur. However, the history of SASS–affiliated matches is free of any serious accident.

Every participant in a SASS match is expected to be a Safety Officer. Each shooter’s first responsibility is for his or her own safe conduct, and all shooters are expected to remain alert for unsafe actions by others.

Range Officers and shooters are expected to confront any participant observed in an unsafe situation, and it is expected the matter will quickly be corrected and not repeated. Any argument concerning the correction of a safety related matter can be expected to result in the offending shooter’s ejection from the range.

While every participant is a safety officer, the assigned Posse Officials and Match Officials, as described in this document, are the ONLY persons who may judge a shooter whether on or away from the firing line.

COWBOY ACTION SHOOTING™
SASS Range Operations Basic Safety Course

RANGE OFFICERS

The purpose of trained club Range Officers is to provide the sport of Cowboy Action Shooting™ with competent, firm, and fair officials in all levels of competition and allow Range Officers to perform any duty on the posse.

The main objective of a Range Officer is to assist the competitor safely through a course of fire and be an authority in all areas of gun safety, any time, any place.

Range Officer's Motto: THE PURPOSE OF THE RANGE OFFICER IS TO SAFELY ASSIST THE SHOOTER THROUGH THE COURSE OF FIRE.

The two words in this statement paramount to why a Range Officer is even necessary on the firing line are assist and safely. Let's look at these two words separately and how they affect one's actions and attitudes.

ASSIST

As a Range Officer, you are there to assist the shooter. You will notice the word "penalize" doesn't appear anywhere, but the word "assist" does. This is not to say you won't be called upon to assess penalties when they are appropriate, but it is NOT your first priority. You are there to prevent safety violations before they occur.

Assisting the shooter may take many forms. Some of the more important ways in which you can achieve this are:

1. **Information.** The best way to assist the shooter is to give consistent, complete information about the stage, such as starting position, starting location, round count for each gun, where to stage each gun, and the intent of the stage. Most of the basic information will appear on the stage description, however, many of the smaller details will not. For example, the shooter may know to sit in the chair at the start, but may not know he can re-position the chair to fit his or her size.

BE CONSISTENT in what you say and how you say it. Make sure only one Range Officer answers any questions for that stage. This way the same question is answered the same way every time. Every posse must hear the same information the same way. Always read the stage description word for word as it appears on the sheet, whether you have it memorized or not.

2. **Shooter Inventory.** Another good way to assist the shooter is to visually inventory each shooter at the line just before starting your range commands. This means you should inspect the shooter to see if they have all the equipment to complete the course of fire. For example, if you know the shooter is supposed to have shotgun shells on their person, but you don't see them, simply ask where they are. Also, look for the appropriate safety equipment. We all know how disconcerting it is to fire your first shot only to realize your earplugs aren't in!

COWBOY ACTION SHOOTING™
SASS Range Operations Basic Safety Course

3. **Assessment.** Assess the shooter's condition. We have all seen a shooter who is suffering from a bad case of match nerves. Even though this person may have plenty of experience, adrenaline is a strong drug and has many adverse effects. A person suffering from the effects of match nerves may be a hazard to himself or others, so it is important to pay special attention to a shooter who may be shaking violently, has trouble talking, or seems a little lost about the stage requirements. It may be wise to suggest the shooter sit down and wait a while longer before he shoots.
4. **Anticipate.** With time and experience, you will be able to anticipate the shooter's next move. If you can anticipate the shooter's next move, you may prevent him or her from acquiring penalties or committing an unsafe act. This is the mark of a truly good Range Officer.
5. **Attitude.** The best Range Officers have the best attitude. If you can do your job well and have fun too, then you will find the posse generally also has a good time. You will additionally find you are less likely to have any serious confrontations, and the posse as a whole will work more efficiently. Remember, it's your attitude that sets the mood for the entire match.
6. **Coaching.** This is the most direct way to assist the shooter after the course of fire begins. The Range Officer should coach only when someone looks momentarily confused or lost, if they attempt to put down a long-gun with the action closed, or address the wrong target. However, it's not your job to "shoot the stage" for the competitor, coaching him in every action and some shooters don't like to be coached at all. It is prudent to determine if there is anyone on the posse who doesn't want to be coached. Coaching is not considered RO interference and, therefore, will never be grounds for a re-shoot.

SAFELY

Safely, as it applies here, has nothing to do with the rules per se. When we talk about assisting the shooter through a course of fire *safely*, we mean "without incident." An accident or incident, which has the potential for injury, is of grave concern to all who are exposed to the danger, which naturally includes the Range Staff. Therefore, it is critical to do what is necessary to avoid or prevent such incidents from occurring. How is this accomplished?

1. **Course Design.** Some course designs are unsafe and should be avoided or changed. Example: a shooter leaves one shooting position and runs *up-range* (towards the spectators) to pull a revolver from his holster. This would mean the shooter, if he draws the revolver too early, could sweep the crowd with the muzzle of the gun. Solution: either stage the revolver so the competitor can't get to it until he or she is pointed in a safe direction, or change the stage so the competitor has to run down-range.
Don't be afraid to refuse to allow your posse to shoot an unsafe stage. Insist the stage be made safe before proceeding.
2. **Anticipate.** Again, if you can anticipate what the shooter may do next, you may be able to stop an unsafe act from occurring. This is not to suggest you are expected to put yourself in danger in order to stop the unsafe act, but you *might* be able to prevent it from happening through verbal direction or physical action.

COWBOY ACTION SHOOTING™
SASS Range Operations Basic Safety Course

3. ***Watch the Gun.*** Many shooters acting as the Timer Operator rarely know what or where to actually look. Often, you will see them counting misses or looking around at the spotters. If you want to *really* know how to make more exact calls and anticipate the shooter's next move, *watch the gun!* By actually looking at the gun, you can identify where the gun is pointing and usually what target the shooter is engaging. This is critical if you have to make a call pertaining to correct target engagement. By watching the gun, you can also identify squib loads, warn the shooter if he or she is getting close to the 170° safety limit, or stop the shooter if there is a problem with the gun itself.
4. ***Stay Within Arm's Length.*** In order to stop an unsafe act, the Range Officer must be within arm's length of the shooter. In fact, the appropriate position for the Range Officer is behind and off to the *strong side* of the shooter. In other words, if the shooter is right handed, the Range Officer should be within arm's length of the shooter, to the rear and right of centerline. In this way, you can see the shooter operate the gun with his or her strong hand. NEVER let the competitor get away from you.

After you have run five or six competitors over a stage, you may get tired or lazy about staying up with the shooter, but remember, if that person commits an unsafe act, such as breaking the 170° safety rule, you will not be in a position to prevent it. If you are more than three feet away, you may not be able to see the gun. If you are getting tired, pass the timer to another Range Officer.

These are just some of the ways the Range Officer can apply safety in a practical manner.

RANGE OFFICER ATTITUDE

1. Be courteous and considerate of your fellow competitors. Never be over zealous in your duties.
2. Always be firm, but fair.
3. When penalizing a contestant, do not allow yourself to be intimidated by the competitor. Stand your ground, but do so in a professional manner.
4. Don't be a "hard-ass."
5. Be helpful to the competitor—learn to identify the seasoned shooters from the newer shooter—you can usually tell by their manner and confidence. If seasoned shooters need to know something, they'll ask; if newer shooters need help or coaching, give them all they need. Pay closer attention to newer shooters—from loading to unloading.
6. Always refer to the SASS Shooters Handbook when stating the rules. Don't quote them from memory; you may be wrong. Enforce the rules as written, not what you think they mean. The Range Operations Basic Safety Course and The Range Officer Training Course offer interpretations and clarifications of the rules and procedures referenced within the SASS Shooters Handbook that will be helpful in making the correct call.
7. Make the call, and call them the way you see them!!! There are checks and balances in place. In cases of rule and policy interpretation, you may be overruled. If you are overruled, don't take it personally. Be glad for the competitor if it goes in his/her favor.

COWBOY ACTION SHOOTING™
SASS Range Operations Basic Safety Course

8. Never allow a competitor to badger, abuse, or argue with you or any other match official. Be firm and fair, but if they persist, don't argue with them. This is a gun sport, not a tennis match! Heated words between folks wearing firearms are not acceptable. Bring this type of behavior immediately to the attention of the Range Master or Match Director.
9. Always read the rulebook from the contestant's viewpoint.
10. Always give the contestant the benefit of doubt.

MATCH PROCEDURES AND TERMS

All match positions described below are Range Officers. The Timer Operator is the Chief Range Officer during shooting stage operations.

1. **Match Director** is in charge of the overall match and is required to ensure qualified officials are in place in all tournament areas.
2. **Range Master** is in charge of and oversees all stages and ensures qualified officials are in place on all stages. He reviews all stages and ensures they are designed and constructed to operate in a safe manner for both competitors and officials.
3. **Posse Marshal**

Posse Marshals cannot perform all of the Range Officer functions themselves, but must ensure Range Officer assignments are made and the rules and regulations are being followed. It is recommended all posse leaders be trained in this Basic Range Operations Course.

- A) Is in charge of a posse and is required to ensure all positions are manned to safely and efficiently run the posse through each course of fire.
- B) Will understand all stages, conduct a walk-through, and answer all questions before beginning each stage.
- C) Will appoint at least one deputy if one is not assigned.
4. **Deputy**
 - A) Acts on behalf of the Posse Marshal when the Marshal is shooting or otherwise unavailable.
 - B) The Marshal and Deputy should be separated in the shooting order.
5. **Timer Operator**
 - A) Is the Chief Range Officer for the stage and is in charge of the firing line, as long as he/she is running the timer.
 - B) Is responsible for assigning and identifying three Spotters. It is a good idea to have bandanas or batons for the spotters to hold. This helps identify the spotters and keeps them on the line until they hand off the baton or bandana to the next spotter.
 - C) The Timer Operator does not have the authority to overrule the spotters but can question spotters as to location of misses. The Timer Operator does have the best advantage to see the direction the muzzle is pointed, which is helpful in edge hits.
 - D) The Timer Operator should be aware of the skill level of the competitors and very attentive to newer shooters, helping and coaching them through the course of fire, as needed, and always ready to control the newer shooter.
 - E) Give seasoned shooters a little more room since they tend to move very fast. Don't let them run over you because you're crowding them.

COWBOY ACTION SHOOTING™
SASS Range Operations Basic Safety Course

- F) The Timer Operator never starts a competitor in a faulted position or location. It is not considered a faulted position or location for allowing a shooter to start without appropriately loaded guns or available ammunition on their person.
 - G) The Timer Operator should not count misses, but watches the shooter for unsafe acts, correct target engagement, and stage procedures in addition to counting shots fired if possible. However, the Timer Operator is often times in the best position to evaluate hits or misses if in question.
 - H) The Timer Operator holds the timer in a manner ensuring the last shots fired in a stage are recorded. This is especially true if the last gun being used in a stage is a rifle, which is always considered poor course design, since rifle reports are often not loud enough to reliably record on a timer.
 - I) Don't feel you have to record every shot on the timer through the course of fire. Make sure the last one is recorded. It's the one that really counts, but it is always best to record as many shots as possible in the event of a gun malfunction.
 - J) Once the stage begins, the Timer Operator stays within arm's length of the competitor until the stage is finished. The Timer Operator then immediately announces the stage time to the shooter. Only after revolvers are holstered and long guns are action opened, muzzles pointed in a safe direction, and the shooter is heading towards the unloading table does the Timer Operator, declare "Range is Clear" and conveys the time to the Score Keeper in a loud, clear voice.
 - K) The Timer Operator polls the three Spotters to determine the number of misses and/or procedural penalties, and then calls those numbers to the Score Keeper and the competitor in a loud, clear voice.
 - L) Only the Timer Operator or Expediter calls the next shooter to the firing line.
- 6. Expediter or XP Officer**
- A) The Expediter or XP Officer is in charge of making sure the posse stays on time and on task during their assigned time on each stage.
 - B) The XP Officer's primary concern is the next shooter to be called to the line—otherwise known as the "On-deck" shooter. The XP Officer makes sure the "On-deck" shooter is ready, understands the course of fire, and proceeds promptly to the firing line to stage firearms and ammunition as quickly as possible.
 - C) The following is a guideline for the duties of the XP Officer:
 - 1. At the first shot of the shooter on the firing line, the XP Officer calls the next shooter from the loading table to the "On-deck" position.
 - 2. When the shooter arrives at the "On-deck" position," the XP Officer asks the following questions and assists the shooter with appropriate answers:
 - Do you understand the course of fire?
 - Do you have any questions about the stage?
 - 3. The XP Officer should not engage in any unnecessary conversation with the "On-deck" shooter, allowing them time to mentally prepare for the stage.

COWBOY ACTION SHOOTING™
SASS Range Operations Basic Safety Course

4. Once the XP Officer feels the “On-deck” shooter is ready, s/he should focus attention on the firing line. Once the line is clear, targets are set, and brass removed (if allowed), the XP Officer instructs the “On-deck” shooter to move to the firing line and stage firearms and ammunition as required by the stage description, then proceed immediately to the starting position.
5. At this point, the Timer Operator or Chief Range office will take charge of the shooter on the line.
 - D) The XP Officer can be a Posse Member, but the best results can be accomplished by having a Berm Marshal or Stage Driver serve in this capacity, if possible.
 - E) The “On-deck” position should have a low table in addition to the loading table in order to accommodate the long guns of the “On-deck” shooter. It is also a good idea to have a copy of the scenario at the “On-deck” position.
 - F) The XP Officer does not count misses, reset targets, score, run the timer, or pick up brass.
 - G) The XP Officer helps assign target re-setters and brass pickers (if allowed).
 - H) Not all matches will benefit from an XP Officer, but the majority of time lost in a match is getting the next shooter to the line and staging their firearms. If used correctly, the XP Officer can shave off up to 30 seconds per shooter, thereby leaving more time for socializing after the shooting is finished!

7. Score Keeper

- A) Score Keepers must never record scores for a family member.
- B) Calls out shooting order and records times and penalties. If scoring instructions dictate, the Score Keeper will also total the times and penalties to calculate the shooter’s score. It is good practice for the Score Keeper to repeat in a loud, clear voice the scoring time announced by the Timer Operator.
- C) The Score Keeper can be one of the Spotters.
- D) The penalties are recorded in a manner not confusing to the person entering computer data. If there are five misses, for instance, don’t simply write “5,” since that can be confused as just a five second penalty. If there is one miss, don’t write “5” thinking someone will assume it just means five seconds. They may read that as five misses and add on twenty-five seconds. It’s best to write 1/5, 2/10, or 3/15 for misses and 1/10 for a procedural.
- E) The competitor should always be aware of any misses or penalties as they are leaving the firing line. The competitor has the right to know, since once they leave the line and unload, miss penalties should not be questioned.

8. Spotters

- A) Must never spot for a family member.
- B) Have the responsibility to count shots and misses and to verify the targets were engaged in the correct order for the required number of shots. Spotters will assist the Timer Operator by watching for violations when the competitor retrieves staged firearms and draws revolvers since it is impossible for the Timer Operator to have an unobstructed view of both sides of the competitor’s body. Spotters are obligated to

COWBOY ACTION SHOOTING™
SASS Range Operations Basic Safety Course

- stop a shooter from attempting an unsafe action if the Timer Operator is not in position to see it or react quickly enough.
- C) Should always be in position to see all the targets in the course of fire. At least one spotter should be positioned on either side of the competitor.
 - D) Determine misses by both visual and audible means, if possible.
 - E) Always give the shooter the benefit of any doubt.
 - F) There should always be three Spotters—the majority (two out of three) breaks the tie. As mentioned before, bandanas or batons are a good idea.
 - G) Remember, the Timer Operator is not relied upon to count shots and misses. His main function is to assist the competitor through the course of fire, and his memory can easily be altered if something out of the ordinary happens or if he becomes occupied coaching a newer shooter through a stage.
 - H) It is up to the Timer Operator to verify at least two of the three Spotters agree on misses.

9. Loading/Unloading Table Officers

- A) Loading Table Officers are responsible to visually check to ensure all firearms are loaded with only the correct number of rounds required in a course of fire. They count, along with the shooter, rounds being loaded into rifles and revolvers.
- B) They check to make sure no round is ever under the firing pin of any firearm and that all loaded firearm hammers are fully down on empty chambers. While at the Loading Table, shooters must be allowed to make corrections as necessary to be sure no round is under the firing pin and hammers are fully down on empty chambers without the assessment of a penalty. Discharging a round at the loading table is a Match Disqualification. Leaving the Loading Table with a hammer not fully down on an empty chamber or with a round under the firing pin of any firearm is a Stage Disqualification.
- C) The Loading Table is also a good place for the Loading Officer to observe the shooter's equipment, especially his firearms, inspecting for illegal modifications. A comment from the Loading Officer may save the shooter an embarrassing disqualification at the shooting line. Any illegal external modifications encountered at the loading table should be brought to the shooter's attention and corrected prior to shooting, if at all possible.
- D) It is good practice for the Loading Officer to ask the shooter if he understands the stage. Explanations at the Loading Table avoid these questions being addressed at the line by the Timer Operator and prevent unnecessary delays.
- E) These officers ensure safe muzzle direction is strictly observed and enforced when a competitor is at a Loading or Unloading Table, as well as during movement to and from the Loading or Unloading Table.
- F) At the Unloading Table, competitors shall unload each of their firearms, and the Unloading Officer must visually inspect all chambers to make sure they are empty. Rifles and shotguns are cycled to verify their magazines are empty. All revolvers

COWBOY ACTION SHOOTING™
SASS Range Operations Basic Safety Course

taken to the firing line must be checked, whether or not they were used, and only two main match revolvers may be taken to the line.

- G) Never allow a competitor to leave the loading table with a loaded firearm unless they are proceeding directly to the stage or expeditor position.

Remember: The primary responsibility always rests with the competitor. Shooters should always know the condition of their firearms and should never depend upon the Loading and Unloading Officers to ensure their firearms are correctly loaded and unloaded. The Loading and Unloading Officers are simply an added measure of safety. A competitor *may never* blame the Loading Officer for an incorrectly loaded firearm, and at no time will this claim be considered grounds for dismissal of penalties.

10. Stage Driver / Stage Marshal / Berm Marshal

The primary responsibility of a stage marshal is to ensure consistency between posses and to keep posses running on time. To do this the following procedures should be followed:

For the first posse of each day's shooting rotations, a bit more time may be in order to get the posse organized. Take a few moments to help them get things underway by going over the posse duties as outlined in the SASS RO course materials. Make sure each posse acknowledges their Posse Marshals and each Posse Marshal understands each of the posse duties to be filled. If a duties list is provided by the match officials, be sure to pass that list on to the Posse Marshal for their personal reference during the match. Ask for questions about any of the posse duties. Only if necessary, assist the posse workers by explaining the role of each worker within the posse in order for the posse to run on time and efficiently.

Before the posse begins shooting the stage, do the following:

- Check the posse schedule to see if the stage is running on time. If the posse is running behind schedule, contact one of the Range Masters and do whatever is necessary to get them back on schedule.
- When a posse arrives, verify they are in the right place at the right time
- Record the time each posse starts the stage on the score sheet for that posse on that stage.
- Read the scenario and stage description, do not paraphrase.
- After the stage walk-through, the posse should assign duties to its members
- Once the assignments have been made, give the appropriate materials (spotting sticks, timer, props and so forth) to the Posse Marshal
- Before handing any score sheets to the scorer, verify they are the correct sheets for the correct posse
- At this point, sit back, relax, and watch the shooters as they shoot the stage.

After the posse has completed shooting the stage, do the following:

- Record the time on the posse score sheet in the score book at that stage.
- Get ready for the next posse by making sure the timer is still working, the pens still write, and the stage is completely set.

COWBOY ACTION SHOOTING™
SASS Range Operations Basic Safety Course

The Stage Marshal does not have the duty to watch every move of the shooter, but does have the duty to make sure each shooter completes the stage according to the directions and they all complete it in the same way. The Stage Marshal is there to promote consistency, prevent controversies, resolve discrepancies, and do everything possible to keep each posse on schedule. If the match is a “lost brass” match, remind each posse the schedule does not allow time for brass pickup (except brass shotgun shells).

It is recommended each Stage Marshal be a graduate of the SASS RO courses, and as such should be familiar with the rules and guidelines. Watch for illegal equipment, ammunition or any category specific requirements and **enforce** the current SASS rules **exactly** as they are written. Do not attempt to interpret, either liberally or conservatively, **any** of the rules. If a problem is encountered, be sure to follow the proper chain of command by bringing it to the attention of the RO and posse leader for quick resolution. If the problem is not quickly and appropriately resolved, notify the Range Master.

Do not hesitate to contact the Range Masters if there are ANY questions. Each Range Master should have a current SASS Handbook and all of the RO reference materials closely at hand just in case a resolution may require some research.

RANGE COMMANDS

Standard Range Commands are used in almost every established shooting sport. It is the most efficient way to run a shooting line. Also, it allows shooters from all over the world to understand range procedures, even if they don't speak English fluently. We're not saying you have to say the range commands exactly word for word, but the closer the better. For instance, instead of “Is the Shooter Ready” the term “Is the Cowboy Ready” is certainly acceptable. After all, the western flavor and spirit of our game allows for colorful individuality. **There is no reason Safety, Efficiency, and Having Fun can't all co-exist! Remember, SPEAK UP! Many of our competitors are a bit hard of hearing, and all are wearing hearing protection.**

1. **“Do You Understand the Course of Fire?”** is the customary initial query at the **Loading Table**. A negative response requires additional explanation. Answer any shooter's questions in a clear and consistent manner. Remember, never make a shooter feel as though he/she is being rushed.
2. **“Is the Shooter Ready?”** is normally the Timer Operator's initial command and should always be said just before the **“Stand By”** command. If the competitor is not ready or doesn't understand the stage, he will ask you questions. If they are ready, they'll just nod their head, and they're ready to hear the “Stand By” command. If they ask a question, answer it to their satisfaction. While the primary goal is to assist the shooter, questions regarding the negotiation of the stage should be kept to a minimum at the firing line. After it is apparent they understand the stage, say again, “Is the Shooter Ready?” Don't just say “Stand By.” It's better when shooters are comfortable and given the courtesy of a starting rhythm. We are not trying to surprise them with the start signal. Don't rush the shooter, but sometimes it is up to the Timer Operator to keep things moving efficiently.

COWBOY ACTION SHOOTING™
SASS Range Operations Basic Safety Course

3. **“Stand By”** should always be the last words spoken with a one- to three-second pause before the start signal unless the stage calls for the shooter to say a line or use a prop before the time starts. **“Indicate Ready by Saying the Line”** can optionally be used to cue the competitor to self-start the stage. The **“Stand By”** command should still be used after the competitor says their line.
4. **“Muzzle up”** Please move to the Unloading Table” should be stated at the end of a shooting sequence. Often the competitor stops thinking—after all, his shooting problem is finished! He simply needs a gentle reminder of what to do next.
5. **“Range Clear.”** This command is given only after the shooter has completed their run, the revolvers are holstered, the long guns are picked up and pointed in a safe direction with the actions open, and the shooter is on the way to the unloading table. It is now safe to gather brass and prepare for the next shooter.
6. **“Down Range”** is announced prior to proceeding down range to reset/repair targets.
7. **“Unload and Show Clear.”** The command used by the Unloading Officer when a competitor comes to the unloading table (applies to all guns taken to the line).
8. **“Gun Clear”** is the appropriate Unloading Officer response as each firearm is successfully inspected empty at the unloading table. **“Thank You”** is appropriate after all guns have been inspected.

ADDITIONAL COMMANDS

1. **“Action Open.”** This command is given by the Timer Operator when a competitor puts a long-gun down with the action closed. The Timer Operator must do everything in his/her power to prevent the shooter from moving from that position with the action on any long-gun closed. If the shooter puts down a gun with the action closed, but returns and opens the action before firing the next firearm, there is no penalty.
2. **“Muzzle!”** This command warns the shooter their muzzle is getting close to the 170° limit and should be pointed back down range.
3. **“Cease Fire!” or “Stop!”** If at any time an unsafe condition develops, the Timer Operator will immediately shout “Cease Fire!” or “Stop!” The shooter is to stop firing or moving immediately. Failure to heed this command is serious and may result in a Match Disqualification. (**“Whoa!”** sometimes works just as well!)
4. **“Yellow Flag.”** On ranges where multiple stages are run in parallel using a common firing line with no separating berms, it is sometimes necessary to go down range to repair broken or malfunctioning targets. Once the **“Yellow Flag”** command has been given, each stage affected will allow any shooter already engaged in that stage to complete the course of fire. As shooting finishes on each stage, all in-use guns are laid down at the loading and/or unloading tables and the competitors will “stand back.” Once the firearms are secure, each stage will signal compliance by showing its own **“Yellow Flag.”** Once all affected stages are displaying their **“Yellow Flag,”** the initiating Range Officer may advance down range. When the offending targets have been fixed and the Range Officer is behind the firing line, an **“All Clear”** command will be given, the Yellow Flags withdrawn, and normal range operations can resume.

COWBOY ACTION SHOOTING™
SASS Range Operations Basic Safety Course

5. **“Red Flag” means “Cease Fire!”** As in “Yellow Flag” above, flags are often used and generally accompanied by a horn, whistle, or shout (“Cease Fire!”). All shooting must immediately stop, and firearms must be laid down or otherwise made safe. Once the ceasefire condition is resolved, an **“All Clear”** command is given, the Red Flags withdrawn, and normal range operations resumed. Any shooter stopped while shooting a stage is given a reshoot.

STAGE CONVENTIONS

Stage Conventions or standard range behaviors are a list of practices every shooter is expected to know and follow on every stage. These stage defaults should be followed in all SASS Matches unless otherwise directed in stage descriptions.

1. All knockdown shotgun targets may be reengaged until down.
2. All knockdown targets (shotgun, rifle, or revolver) must go down to count.
3. All staged guns shall have their barrels pointed safely down range. All long guns initially staged on a horizontal flat surface shall be staged lying flat where at least the rear of the trigger guard is on the staging area. All handguns initially staged on a horizontal flat surface must be staged with the entire handgun lying flat on the staging surface.
4. Staged shotguns will be open and empty.
5. Shooters may not start a stage with ammunition in hand.
6. Long guns will be discarded open and empty with their barrels pointed safely down range.
7. Revolvers are returned to leather after the shooting string.
8. Revolvers are drawn and used in accordance with the shooter’s category.
9. Safe gun handling is the shooter’s responsibility. The 170-degree safety rule is in effect.
10. If no starting position is given the shooter shall stand fully erect with revolvers holstered, hands at the side not touching any firearm.
11. Cowboy port arms is defined as standing fully erect with the butt of the long gun at or below the waist of the shooter, the muzzle at or above the shoulder, and the long gun held with both hands.
12. Interpersonal conflicts WILL NOT be tolerated.

SINGLE ACTION SHOOTING SOCIETY™

SASS Range Operations Basic Safety Course

APPENDIX A - RANGE SAFETY RULES

All participants are Safety Officers; however, it is the ultimate responsibility of the Range Officers to assure the safety rules are consistently followed. The following outlines specific safety violations and their penalties.

Illegal equipment penalties are not awarded backwards. If a shooter is found to have illegal equipment, no penalty will be assessed for the stage(s) already completed.

If a Range Officer elects not to penalize a shooter that has not complied with a rule, the effect is penalizing all other match participants that did comply.

1. Every firearm must be treated with respect! Covering or sweeping an individual or group with the muzzle of an empty gun will result in a Stage Disqualification. Covering or sweeping an individual or group with the muzzle of a loaded gun will result in a Match Disqualification. Handling guns away from the firing line should be avoided but if necessary should be limited to safe areas.
2. Long guns will have their actions open with chambers and magazines empty and muzzles pointed in a safe direction when being carried to and from the designated loading and unloading areas for each stage. Chambers and magazines must be empty and actions open for all firearms transported at a match. Muzzle direction is important between, before, and after shooting a stage. A muzzle must not be allowed to “sweep” the other participants between stages, or when moving the firearms from the gun cart to the loading tables. The muzzles of all long guns must be maintained in a safe direction (generally “up” and slightly down range), even when returning to the unloading table. A holstered revolver (loaded or empty) with the hammer fully down on an empty chamber or expended case is considered safe and may not be interpreted as sweeping another shooter while safely secured in the holster. Failure to manage safe muzzle direction, even though no individual is swept, is grounds for Stage Disqualification, and for repeated offenses, Match Disqualification.
3. All firearms will remain unloaded except while under direct observation of a designated person on the firing line or in the designated loading and unloading areas. NOTE: Percussion revolver shooters must ensure they maintain safe muzzle direction during loading and have fired or cleared all capped chambers prior to leaving the unloading area. It is not permissible to seat percussion caps on a revolver’s nipple using the gun’s hammer. Some Range Officers will require the percussion revolvers be cleared before leaving the firing line. Failure to adhere to loading and unloading procedures will result in a Stage Disqualification. Leaving the unloading table without clearing all firearms is failure to adhere to unloading procedures and will result in the penalty being assessed on the stage where the infraction was committed.
4. Six-guns are ALWAYS loaded with only five rounds and the hammer lowered and resting on the empty chamber. Five-shooters may load five rounds, but the hammer must rest on a dummy chamber or safety slot in the cylinder so the hammer does not rest on a live round/cap. All guns are loaded based upon stage requirements. If a particular stage requires a one shot reload, the sixth chamber of percussion revolvers may be charged at the bench and

SINGLE ACTION SHOOTING SOCIETY™

SASS Range Operations Basic Safety Course

then capped “on the clock”, either before the first round is fired or after the last round is fired. A complete reload for percussion revolver shooters is handled by staging a loaded, uncapped revolver down range or switching uncapped cylinders and capping on the clock. Loading more than the correct number of rounds in long guns will result in the assessment of a 10-second Minor Safety Penalty. Loading a revolver to maximum capacity and lowering the hammer on a live round and/or holstering or staging the fully loaded revolver will result in a Stage Disqualification.

5. No cocked revolver may ever leave a shooter’s hand (Stage Disqualification). This also means from one hand to the other.
6. Revolvers are returned to leather (re-holstered) with hammer down on a spent case or empty chamber at the conclusion of the shooting string, unless the stage description specifically directs otherwise; e.g., “move to next position and set gun on table or prop.” A shooting string is defined as shots from one type of firearm prior to the next type of firearm engaged. (Gunfighters may choose to shoot five rounds, safely stage their loaded revolvers, hammer down on a spent cartridge, shoot another firearm, retrieve the revolvers, and finish the “shooting string” before re-holstering.)
7. De-cocking may not be done to avoid a penalty if cocked at the wrong time, position or location. NO gun may be de-cocked on the firing line except by pointing it down range and pulling the trigger or while under the direct supervision of a stage officer. The penalty for de-cocking is a Stage Disqualification.
8. Once a revolver is cocked, the round under the hammer must be expended in order for it to be returned to a safe condition. Once a rifle is cocked, either the round under the hammer must be expended or the action opened in order for the rifle to be returned to a safe condition. Shotgun shells may be removed without penalty to return the firearm to a safe condition.
9. If a firearm is shot out of sequence or from the wrong position or location, the shooter will be awarded a single procedural penalty. In this situation, if the shooter elects or is forced to miss an appropriate target due to unsafe angles or target availability, a round may be reloaded to avoid a miss penalty (the dreaded “Double Jeopardy” of a procedure and miss). This does not mean a shooter may reload a rifle or revolver at any other time to make up a miss. Unfired ejected rifle rounds may be reloaded.
10. Inadvertently leaving unfired rounds in a revolver is a miss unless the round is under the hammer, then it is a Stage Disqualification.
11. Safe conditions of firearms during a course of fire are as follows:
 - Revolver(s)
Safe for movement in hand, while holstering, and safe to leave the shooter’s hand.
 - Hammer fully down on an empty chamber,
 - Hammer fully down on an expended round (may not be originally staged in this condition but may be restaged in this condition).
 - While the above restrictions apply, there are additional considerations for the Gunfighter. When shooting “Gunfighter Style,” a gunfighter may not holster

SINGLE ACTION SHOOTING SOCIETY™

SASS Range Operations Basic Safety Course

revolvers with the intent to engage another revolver sequence. Once cocked, all rounds are to be expended prior to holstering unless the revolvers were drawn at the wrong time or a revolver/ammunition malfunction has occurred. Physical stage design may allow a competitor shooting “Gunfighter Style” to stage or restage revolvers between firearm sequences.

- Rifle
 - Safe to leave the shooters hands.
 - Empty, action open
 - Hammer fully down on an empty chamber or spent round, action closed (restaged for further use)
 - Safe for movement rifle in hand only
 - Hammer fully down on an expended round, action closed
 - Action open, round on carrier or in chamber
- Shotgun
 - Safe to leave the shooters hands.
 - Empty, action open
 - Safe for movement shotgun in hand only
 - Action open, round in chamber or on carrier
 - Hammer(s) fully down on empty chamber(s) or expended round(s), action closed.

12. The shooter with firearm in hand shall never be allowed to move with a live round under a cocked hammer. Movement is defined the same as “traveling” in basketball. Once the firearm is cocked, one foot must remain in place on the ground until the firearm is made safe. This means, on revolvers, you may move, restage, or re-holster when the hammer is down on an empty chamber or expended case. You may move with a rifle or shotgun when the action is open, hammer(s) down on empty chamber(s) or expended case(s). If restaging the rifle, the action must be closed and hammer down either on an empty chamber or expended case. Shotguns may be restaged only if open and empty.

13. Any discharge that hits the ground or stage prop from five to ten feet from the shooter, while on the firing line, will result in a Stage Disqualification. Any discharge that hits the ground or stage prop less than five feet from the shooter while on the firing line, any discharge at the loading or unloading areas, any discharge off the firing line, or any discharge that is deemed unsafe will result in a Match Disqualification.

Note: Match directors have the latitude to place props so shooters must negotiate them. In doing so, Match Directors may declare props expendable or shootable without penalty.

When drawing a revolver from its holster, the revolver shall not be cocked until it is at a 45° angle down range. (Minor Safety Violation)

14. A round over the berm is always a bad idea but is worse on some ranges than others. Local match regulations establish the appropriate penalty, up to and including a Match Disqualification.

SINGLE ACTION SHOOTING SOCIETY™

SASS Range Operations Basic Safety Course

15. Rifles may be “staged” with the magazine loaded, action closed, hammer fully down on the empty chamber (not on the “safety” notch), as long as the muzzle is pointed in a safe direction—adheres to the 170° safety rule, and the muzzle is never on the ground.

Note: When the muzzle is “on the ground,” the barrel will normally be “up-range” from the receiver, violating the 170° safety rule.

16. Shotguns are always “staged” open with magazine and chambers empty, never with the muzzle on the ground, and are loaded on the clock unless the stage description states otherwise. Shotguns may be opened and rounds removed or replaced without penalty. It is permissible for mule-eared shotguns to be “cocked” at the beginning of a scenario, whether staged or in the shooter’s hands. Scoring is very difficult when both barrels of a double barreled shotgun are fired simultaneously, so stages should not be designed incorporating a shotgun double tap.
17. Long guns will have their actions left open and the magazine/barrels empty at the conclusion of each shooting string. A 10 second minor safety penalty will be assessed if the firearm is not cleared and opened. This condition may be corrected prior to the next round being fired. If the long gun is the last firearm used, it must be cleared prior to it leaving the shooters hand(s) at the unloading table. This does not apply to guns shot out of sequence and made “safe” and then restaged.
18. A live round left in the chamber constitutes a Stage Disqualification. A live round left in the magazine or on the carrier, as well as an empty round left in the chamber, magazine, or on the carrier of the gun in which it was loaded, constitutes a 10-second Minor Safety violation. Malfunctioning guns still containing rounds will not warrant penalties so long as the malfunction is declared and the gun made safe (handed to the Range Officer or placed on a prop with the muzzle in safe direction). At this point, the firearm is still loaded, everyone knows it, and the firearm can be handled in an appropriate manner.
19. All shooters must demonstrate rudimentary familiarity and proficiency with the firearms being used. While monthly club matches are certainly an excellent training ground, SASS matches are not the forums in which to learn basic firearms handling. Basic firearms safety and rudimentary proficiency training are more appropriately learned under non-match conditions. SASS matches can then be used to mature the learned skills.
20. SASS affiliated matches are not fast draw competitions. Any unsafe gun handling in the course of a draw from the holster or any “fanning” will result in a Stage Disqualification. A second offense will result in Match Disqualification. NOTE: “Slip-hammering” is not the same as “fanning” and is legal.
21. Although cross-draw and shoulder holsters are legal, they represent a significant safety concern. No holster may depart from the vertical by more than 30° when worn. Extreme care must be exercised when drawing a firearm from a cross-draw or shoulder holster or returning the firearm to leather. The user must “twist” their body, if necessary, to ensure the muzzle never breaks the 170° safety rule during the process. (NOTE: The 170° safety rule

SINGLE ACTION SHOOTING SOCIETY™

SASS Range Operations Basic Safety Course

means the muzzle of the firearm must always be straight down range +/- 85° in any direction. If a competitor “comes close” to breaking the 180° safety plane, the 170° safety rule has been violated and the competitor is at fault). Shooters competing in the Gunfighter or “B” Western Category must wear two standard holsters, one on each side of the body. Cross draw, shoulder, or butt forward holsters are not allowed within these two categories. It is also necessary to note that during the course of fire, the shooter must be given the ability to draw and holster revolvers from “straight hang” holsters and the ability to retrieve and return vertically staged double-barreled shotguns without penalty.

Any gun that breaks the 170° safety rule will result in a Stage Disqualification.

22. Movement is not allowed with a loaded, cocked firearm. Movement is defined by the basketball “traveling” rule. Whenever a shooter has a loaded, cocked firearm in hand, at least one foot must remain in place on the ground. 1st violation will result in Stage Disqualification; 2nd violation will result in Match Disqualification. This includes leaving the loading table with a cocked loaded firearm.
23. Any unloaded gun dropped during a stage will result in Stage Disqualification. Dropped unloaded guns away from the line will be a no call. A shooter is forbidden from picking up a dropped gun. The Range Officer will recover the gun, examine it, clear it (if necessary), return it to the shooter, and assess the penalty. A dropped loaded gun is a Match Disqualification. An open, empty long gun that slips and falls after being set down and does not break the 170° safety rule or sweep anyone will result in either a “Prop Failure” call or a 10-second Minor Safety Violation, depending upon the circumstance.

As long as the shooter has contact with the firearm, it is considered as still in their control. No call should be made until the firearm comes to rest – wherever that may be. Then determine the condition of the firearm at rest and whether or not the 170° safety rule was ever broken on its way to its final resting point in order to assess the proper penalty (if any at all).

24. Ammunition dropped by a shooter in the course of loading or reloading any firearm during a stage or “ejected” is considered “dead” and may not be recovered until the shooter completes the course of fire. The round must be replaced from the shooter’s person or other area as required by stage description, or if the round is not fired it is counted as a missed shot.

For example, if a round of shotgun ammo is dropped while loading, the round must be replaced from the shooter’s person or other area as required by stage description or counted as a miss. No attempt may be made by the shooter, or any other person, to pick up the dropped round for use on that stage. Shooters trying to recover a dropped round prompts loss of muzzle direction control. Once the dropped round leaves the shooter’s hand or control, it is considered to be a dead round. Stop the shooter if he tries to recover the dead round. It is a 10-second Minor Safety Violation if the shooter retrieves the round during the stage.

SINGLE ACTION SHOOTING SOCIETY™

SASS Range Operations Basic Safety Course

Staged rounds that are dropped back where they were staged are NOT considered “dead.” For example, if a round is staged in a box on a table and it is dropped back into the box, it may be picked up. If it falls onto the table, it may not be picked up. Rounds safely “placed” onto a prop from their original loading area are not considered “dropped” rounds as long as recovering these rounds does not create loss of muzzle control.

25. The Unloading Officer MUST inspect all firearms before they leave the stage. Rifles must have their action cycled for the Unloading Officer and chambers inspected. All revolvers, whether used or not in the stage, must be inspected, including cap and ball revolvers. Shotguns must have actions open or cycled and chambers inspected. It is acceptable to leave one or more chambers charged in a percussion revolver so long as the caps are removed from the nipples.
26. Alcoholic beverages are prohibited in the range area for all persons, shooters, guests, range officers, and others until all shooting is over for the day and firearms have been stored. You must also take into consideration the rules of the specific range in this matter and respect those rules. A violation of this rule will result in Match Disqualification.
27. No shooter may ingest any substance that may affect his or her ability to participate with a maximum state of awareness and in a completely safe manner. Both prescription and non-prescription pharmaceuticals that may cause drowsiness or any other physical or mental impairment must be avoided. A violation of this rule will result in a Match Disqualification and ejection from the range.
28. Hearing protection is highly recommended and eye protection is mandatory in and around the shooting areas. While small, period glasses look great, full protection, high impact glasses are strongly recommended. Eye protection is mandatory for all shooters and spectators within direct line of sight of steel targets.
29. All loading and unloading shall be conducted only in the designated areas.

NOTE: Percussion revolver shooters must exercise care to ensure they maintain safe muzzle direction during loading and have fired or cleared all caps prior to leaving the unloading area. It is not permissible to seat percussion caps on a revolver’s nipple using the gun’s hammer. Percussion revolvers may only be capped at the loading area or on the firing line.

30. Dry firing at the loading table is not allowed and will result in a Stage Disqualification. Dry firing is allowed only at designated safe areas. Dry firing is defined as the act of bringing the gun into a shooting position, cocking the hammer, and pulling the trigger as if to cause the gun to fire normally.
31. Only registered competitors may wear firearms.
32. If a competitor has a firearm malfunction that cannot be cleared on the line, the firearm may not be removed from the firing line/unloading area until the firearm has been cleared. A Match Disqualification will be awarded to the shooter if the firearm leaves the firing line/unloading area with the firearm unless under the direct supervision of a Match Official.

SINGLE ACTION SHOOTING SOCIETY™

SASS Range Operations Basic Safety Course

33. Main match targets are recommended to be fabricated from metal and be approximately 16" X 16" in size. Distances for revolver targets should be 7 to 10 yards, shotgun targets should be 8 to 16 yards, and rifle targets should be placed at 13 to 50 yards.
34. The minimum standard for center-fire ammunition used in all smokeless categories at State, Regional, National, International and World Championship Competitions is not less than a minimum power factor of 60 and no velocity may be less than 400 fps. The maximum velocity standard for revolvers is 1000 fps. The maximum velocity standard for rifles is 1400 fps. Buckaroo Category shooters choosing to use center-fire ammunition in handguns and/or rifles must also meet all power factor and velocity requirements. Pocket pistols and derringers are exempt from the power factor and velocity requirements.
35. Failure to stage guns or ammunition at the designated position(s) or location(s) is the fault of the competitor and scored as a procedural unless the competitor is able to correct the situation, unassisted, while in the process of completing the stage under time.
36. Ammo on belts must be worn just above the pistol belt at or below the belly button. Shotgun slides may not be worn over a shotgun belt.
37. Competitors shall unload each of their firearms at the designated unloading area and have them visually inspected to make sure all chambers empty. Rifles and shotguns must be cycled to verify their magazines are empty. All revolvers taken to the firing line must be checked, whether or not they were used, and only two main match revolvers may be taken to the line.
38. Competitors arriving at the designated loading area with uncleared firearms after completing a stage within the same day will be assessed a Stage Disqualification penalty on the previously completed stage.
39. Competitors shall not leave the designated loading area with a loaded firearm unless they are proceeding to the stage as the next competitor to begin the stage.

RANGE OPERATIONS SUMMARY

1. It is expected the Range Officers will have the primary responsibility for observing and resolving all safety-related matters occurring in the loading, unloading, and firing line areas. The Range Officers will make the final determination of penalties and scores. Due care and diligence by the shooter will be taken into consideration when determining whether or not a penalty is valid, based upon factors such as a range equipment or prop malfunction.
2. In the event a competitor doesn't agree with a Range Officer's final penalty or assessment, the competitor has the right to "politely" request a Supervising Match Official (Range Master or Match Director) to review the call. The Range Officer's call can be overruled only in the case of a rule or policy interpretation.

At annual matches and above, the Match Director should recruit a number of Territorial Governors to hear the shooter's complaint and make a judgment. Three Territorial

SINGLE ACTION SHOOTING SOCIETY™

SASS Range Operations Basic Safety Course

Governors (three break a tie) are suggested, and none should be from the shooter's home state. The Match Director administers the hearing and refrains from voting.

Fees may be charged to file a protest, preventing frivolous protests. The fees are sometimes returned if the protest is upheld.

3. **Minor safety infractions** occurring during a course of fire that do not directly endanger persons will result in a **10-second penalty** being added to the shooter's time for that stage. "Minor" safety infractions are occurrences such as failure to open a long gun's action at the conclusion of a shooting string or failure to return an empty revolver to its holster at the conclusion of a shooting string.
4. **Major safety infractions** will result in the shooter's Disqualification from the Stage or Match. "Major" infractions include: a dropped gun, a discharge that is unsafe or a discharge that impacts less than ten feet from the shooter, violation of the 170° safety rule, "sweeping" any person with the muzzle of a firearm, and similar acts that have high potential for personal injury. There are circumstances where a single Major Safety violation will result in a **Match Disqualification**. (See Addendum for listing of penalties.)
5. A safe and sturdy place should be provided at each stage to position the shooter's firearms and is mandatory to use. Whether or not they are available, it is the **shooter's responsibility** to take reasonable care in putting down the gun. If the gun falls, the Range Officer shall make the determination of fault: either **Prop Failure or Safety Violation as appropriate**.

RE-SHOOTS/RESTARTS

SASS matches above the club level are "no alibi" matches. Once the first round goes down range, the competitor is committed to the stage and must finish the stage to the best of his or her ability. Reshoots/restarts are not awarded for ammunition or firearm malfunctions. However, if there is a range failure (failure of props, timer, or the range officers) beyond the competitor's control, a restart may be granted. On a reshoot/restart, the competitor starts over clean, carrying only accrued safety penalties forward. At all SASS annual club, state, Regional, National, and World Championship matches, no reshoots/restarts will be given after the first shot goes down range as determined by the Range Officer and the Match Director, except for:

- Prop or match equipment failure
- A Range Officer impeding the progress of the shooter
- Timer failure or unrecorded time

For example, if the Range Officer stops a shooter from completing a shooting sequence because of a suspected squib load, and the gun turns out to be "clear," the Range Officer has impeded the progress of the shooter, and a restart is in order. In this case, the shooter starts over with no misses or penalties (except safeties).

Proper coaching or no coaching at all is not considered RO Interference and therefore will never be grounds for a reshoot/restart.

SINGLE ACTION SHOOTING SOCIETY™

SASS Range Operations Basic Safety Course

Restarts shall be allowed for a competitor to achieve a “clean” start, up to the point at which the first round goes down range. Multiple restarts by the same shooter, that in the judgment of the R.O. are seen to be taking advantage will not be entertained as they are not in the *spirit of the game*.

APPENDIX B

THE 10 “COMMANDMENTS”

- Safety
- Keep it fun
- Use common sense
- The benefit of the doubt goes to the shooter
- Treat everyone as you would like to be treated
- Treat everyone equally (Sam Colt made us that way)
- Keep the stage moving (if a problem arises, take it away from the firing line)
- Make sure all the assignments are covered
- Coach when needed
- Keep it simple

SCORING

It is recommended SASS matches be scored by an overall ranking system. This scoring system equalizes the difference in stages and rewards the most consistent shooter. Using this system, the recommended stage disqualification score is 999.00 seconds and the recommended match disqualification score is 999.99 seconds on all stages. The recommended score for not finishing a stage is a Stage Disqualification.

Other scoring systems may be used at state and local levels, such as overall time. If overall time is used, a maximum allowed time for each stage should be calculated prior to the match to be used as the disqualification score and maximum stage score. It is recommended the maximum time allowed for a stage be a total of all the available miss penalties plus 30 seconds.

SASS Sanctioned Championships at the State level or higher may not sell or incorporate in any other manner any score enhancing items such as “Free Misses” or “Do-Overs.”

PENALTY OVERVIEW

5-SECOND PENALTIES

Rifle, revolver, and shotgun targets must be engaged with the appropriate type of firearm. A “miss” is defined as the failure to hit the appropriate target type using the appropriate type firearm. Target placement should always allow a shooter the opportunity for a clean miss to be scored without argument. Overlapping targets of the same type should be avoided if at all possible and should not cause a Procedural “trap” by making it difficult to determine the shooter’s intent when engaging the targets.

- Each missed target.
- Each unfired round.
- Each target hit with an incorrect firearm, either intentionally or by mistake.

To help understand this concept, a “MISS FLOW CHART” is found in Appendix C. It is also good to understand “**A MISS CANNOT CAUSE A PROCEDURAL.**”

SINGLE ACTION SHOOTING SOCIETY™

SASS Range Operations Basic Safety Course

10- SECOND PENALTIES

Procedural Penalties

Any unintentional procedural errors caused by “brain fade,” confusion, ignorance, or mistakes (not to exceed one for any given stage).

- Failure to attempt to fire a firearm.
- Failure to attempt a prop or stage maneuver.
- Shooting targets in an order other than as required by stage description.
- Engaging the stage (firearms, targets, or maneuvers) in an order other than as required by the stage description.
- Failure to adhere to the guidelines of the category in which you are competing.
- Firing any firearm from a position or location other than as required by the stage description.

Minor Safety Penalties

- Not leaving a long gun action open at the end of the shooting string or before the next firearm is fired.
- Leaving empty or live rounds in magazine or carrier of the long gun in which it was loaded.
- Loading more than the correct number of live rounds in a firearm.
- Not returning revolvers to leather unless otherwise specified.
- Open, empty long guns that slip and fall but do not break 170° safety rule or sweep anyone.
- Retrieving a dropped “dead” round.
- Cocking a revolver before it reaches 45 degrees downrange.

Accommodations are always allowed for those unable to comply with specific stage procedures due to physical limitations with no procedural penalties assessed.

STAGE DISQUALIFICATION

- Any dropped unloaded gun on the firing line (between the loading table and the unloading table).
- Long guns that slip and fall and break the 170° safety rule.
- A discharge striking anything five to ten feet from the shooter. *Note: Exception under item 13 Appendix A*
- Violation of the 170° safety rule/ Failure to manage appropriate muzzle control.
- Returning a revolver to leather with hammer not fully down on spent round or empty chamber.
- A cocked revolver leaving the shooter’s hand.
- A live round left in the chamber of a long gun.
- Second offence, in the same match, for failure to adhere to the guidelines of the category in which the shooter is competing.
- Changing location with a live round under a cocked hammer or a gun with the hammer down on a live round.
- Unsafe firearm handling, such as fanning.

SINGLE ACTION SHOOTING SOCIETY™

SASS Range Operations Basic Safety Course

- Loading at other than the designated loading position or firing line.
- Use of an illegal or illegally modified firearm.
- Use of illegal items.
- Holstering or staging a revolver with the hammer down on a live round.
- Sweeping anyone with an unloaded firearm.
- Failure to adhere to loading and unloading procedures.
- Dry firing at the loading table.
- De-cocking a revolver, rifle or hammered shotgun with a live round under the hammer.
- Arriving at the designated loading area with uncleared firearms after completing a stage within the same day (assessed on the previously completed stage).

MATCH DISQUALIFICATION

- Two accumulated Stage Disqualifications or Two Spirit of the Game assessments.
- Belligerent attitude / Unsportsman-like conduct.
- Shooting under the influence of alcohol, prescription, or other medication that may impair the shooter's physical or mental abilities.
- Shooting illegal ammunition. This includes ammunition that exceeds the maximum velocity and shotgun shells that have been bottle-neck resized or ringed. This does not include ammunition that does not meet the power factor.
- Dropping a loaded firearm.
- Any discharge that hits the ground or stage prop less than five feet from the shooter, any discharge at the loading or unloading areas, or discharge that is deemed unsafe . *Note: Exception under item 13 Appendix A*
- Sweeping anyone with a loaded firearm.
- Third offence, in the same match, for failure to adhere to the guidelines of the category in which the shooter is competing.
- Interpersonal conflicts.

FAILURE TO ENGAGE/SPIRIT OF THE GAME

30-Second Penalty

- Willfully shooting a stage other than the way it was intended in order to gain a competitive advantage.
- Shooting ammunition that does not meet the power factor, minimum velocity. The penalty is applied for each stage a competitor is checked and their ammunition is found not to meet the power factor or minimum velocity.
- Willfully refusing to rope a steer, throw a stick of dynamite or otherwise make an attempt to complete any other non-shooting procedure written within the stage instructions.
- Note: Two Spirit of the Game or Failure to Engage penalties will result in a Match Disqualification.

ILLEGAL ITEMS

The following are examples of SASS “illegal” items. The current version of the SASS Handbook should always be used as an additional reference for illegal items. The use or presence of any outlawed item is a Stage Disqualification.

SINGLE ACTION SHOOTING SOCIETY™

SASS Range Operations Basic Safety Course

- Shotgun belts not worn just above the pistol belt or touching the belly button.
- Holsters departing from the vertical by more than 30 degrees when worn
- Two main match revolvers worn on the same side of the body
- Loading during the stage from bandoleers that are tied down in any manner
- Modern shooting gloves
- Short sleeve shirts (Male competitors only)
- Short sleeved tee shirts, long sleeved tee shirts, and tank tops for all competitors. (Long sleeved Henley type shirts with buttons are allowed.)
- Modern feathered cowboy hats
- Designer jeans
- Ball caps
- Tennis, running, jogging, aerobic or other modern athletic shoes, combat boots
- Apparel displaying manufacturer's, sponsor's or team logos. Manufacturer's labels on such apparel or equipment are acceptable.
- Nylon, plastic, or Velcro accouterments.
- Wearing a shotgun slide on a shotgun belt.

APPENDIX D - POCKET RO CARD

 Pocket RO Card (Current as of January 2008) “SDQ” = Stage Disqualification; “MDQ” = Match Disqualification “MSV” Minor Safety Violation = 10 Second penalty	M	S	M
	S	D	D
	V	Q	Q
Loading at other than designated location		√	
Loading too many rounds (long gun)	√		
Empty or live round left in a long gun after the next gun is fired, or if last gun, put down on the unloading table.	√		
Live round in long gun (chamber)		√	
Holstering or staging gun with hammer cocked (not fully down) or down (on a live round)		√	
Revolvers not returned to leather (unless stage instructions to the contrary)	√		
Retrieving “Dead” dropped ammo rounds	√		
Dropped gun (unloaded/empty)		√	
Dropped gun (loaded)			√
Discharge impacting 5-10 feet from shooter, while on the firing line		√	
Discharge impacting within 5 feet from shooter, while on the firing line or any discharge away from the firing line Any discharge in the loading or unloading areas.			√
Cocked revolver leaving shooter’s hand		√	
Changing location or leaving the designated loading area with a cocked gun/gun w/hammer down on live round		√	
Unsafe gun handling (fanning, etc.)		√	
Open, empty long guns that slip and fall but don’t break 170 or sweep anyone	√		
Use of illegal or illegally-modified firearm		√	
Dry firing at the loading table		√	
Cocking a revolver before it reaches 45 degrees downrange	√		
Arriving at the designated loading area with uncleared firearms after completing a stage within the same day (assessed on the previously completed stage)		√	

 Pocket RO Card “SDQ” = Stage Disqualification; “MDQ” = Match Disqualification “MSV” Minor Safety Violation = 10 Second penalty	M	S	M
	S	D	D
	V	Q	Q
Not leaving long gun action open after shooting	√		
Violation of 170 rule (without sweeping anyone)		√	
Sweeping anyone with unloaded firearm		√	
Sweeping anyone with loaded firearm			√
Any two (2) stage DQ’s or 2 F.T.E./S.O.G.’s during the course of a match			√
Not adhering to loading or unloading procedures		√	
Belligerent attitude/unsportsmanlike conduct			√
Shooting under the influence of alcohol, drugs, or impairing medications			√
De-cocking to avoid a penalty if cocked at the wrong time, position or location		√	
Leaving the firing line with a malfunctioning firearm unless under direct supervision of a match official			√
Shooting out of category. e.g., Not wearing the correct items in Classic Cowboy or not making enough smoke in B/P Categories 1 st violation is a procedure, 2 nd violation is SDQ, 3 rd violation is MDQ.	P	2	3

Procedural: Unintentional errors caused by confusion or mistakes. If unable to comply with stage instructions due to physical limitations or handicap, the RO may make allowances for the shooter to complete the stage w/o penalty, adhering as closely as possible to the spirit of the game. **10 seconds; no more than one procedural penalty may be assessed per stage**

Failure to Engage/Spirit of the Game: Willfully shooting a stage other than the way it was intended in order to gain a competitive advantage, not meeting the Ammunition Power Factor or willfully disregarding a non-shooting procedure. **30 seconds**

Re-shoots are granted for failure of props/match equipment; Range Officer impeding shooter progress; or timer failure. Failure of shooter equipment or firearms may be granted at the discretion of the Match Director (except at annual or state/regional championships and above). Only safety penalties carry over.

Restarts shall be allowed for a competitor to achieve a “clean” start, up to the point at which the first round goes down range. Multiple restarts by the same shooter, that in the judgment of the R.O. are seen to be taking advantage, will not be entertained as they are not in the spirit of the game.

GLOSSARY OF TERMS

170° Safety Rule - means the muzzle of the firearm must always be pointed down range +/- 85 degrees in any direction.

Adjustable sight style revolver – a revolver with dovetailed or adjustable rear sights and/or dovetailed front sights. Ramp style front sights are allowed if original to the firearm.

Basketball Traveling rule – aka movement with a firearm. Once the firearm is cocked, one foot must remain in place on the ground until the firearm is made safe. This means, on revolvers, you may move, restage, or re-holster when the hammer is down on an empty chamber or expended case. You may move with a rifle or shotgun when the action is open or hammer(s) down on an empty chamber(s) or an expended case(s).

Cleared – no live or empty cases in or on the chamber, magazine or carrier.

Cocked – hammer not fully down (full, half-cock or safety notch).

Committed – the point at which a firearm would have to be made safe to leave the shooter's hand, and the point when the shooter is required to continue with the course of fire.

Commonly available – obtainable by anyone given ordinary circumstances with ordinary means.

Course of fire – from the beep of the timer once the shooter has signified “ready” to last the shot fired.

Double Duelist shooting style - a revolver cocked and fired one handed and unsupported, with each hand, that is, left gun with the left hand and right gun with the right hand. The revolver, hand or shooting arm may not be touched by the offhand except when resolving a malfunctioning revolver problem or when transferring the revolver from one hand to the other.

Down range – 180 degrees from the shooter toward the targets of a stage.

Dropped round/firearm – a round/firearm that has left the shooter's control and come to rest at a location or position other than where it was intended.

Dry firing – defined as the act of bringing of an unloaded firearm into a shooting position, cocking the hammer and pulling the trigger as if to cause the gun to fire normally.

Duelist shooting style – a revolver cocked and fired one handed, unsupported. The revolver, hand, or shooting arm may not be touched by the off hand except when resolving a malfunctioning revolver problem or when transferring the revolver from one hand to the other.

Engaged – attempting to fire a round at the target.

Equipment – any non apparel item that you take to the firing line.

Failure to engage – willfully or intentionally disregarding the stage instructions in order to obtain a competitive advantage and is not simply because a competitor “makes a mistake.”

Applies only to non-shooting situations such as refusing to rope a steer, throw a stick of dynamite or otherwise make an attempt to complete any other non-shooting procedure written within the stage instructions.

Firing line – From first firearm placed on the loading table until all firearms are confirmed as cleared at the unloading table.

Fixed Sight style revolver - barrel mounted, fixed metallic foresights of a simple blade, bead, or post configuration combined with a simple open notched rear sight cut into the frame, hammer, or latch mechanism. (note exceptions for conversion revolvers).

SINGLE ACTION SHOOTING SOCIETY™

SASS Range Operations Basic Safety Course

Free Style – shooter has the option of shooting Two-handed style or Duelist style.

Gunfighter shooting style – shooting a revolver in each hand. Revolvers must be cocked and fired one handed, unsupported, one right handed and the other left handed. There is no set pattern as to how the revolvers are to be fired

Hammer down – hammer fully down at its final resting position.

Location – a physical point on a stage e.g. “behind the door...”

Major Safety Violation – a safety infraction that has a high potential for personal injury.

Minor Safety Violation – handling or firing a gun in a manner that is unsafe but does not directly endanger persons.

Miss – a failure to hit the appropriate target type using the appropriate firearm type. For further explanation of how to assess a miss, see “Miss Flow Chart” in the appendix to ROI Manual.

Position – the posture and stance of the shooter e.g. “the shooter starts with hands touching hat...”

Power factor - Bullet weight (in grains) times the velocity(in feet per second); divided by 1000. The minimum standard in all SASS matches is not less than 60 and no velocity less than 400 fps. Maximum velocity for revolvers is 1000 fps. Maximum velocity for rifles is 1400 fps.

Procedural – an unintentional action where the competitor does not follow the Stage instructions, can include actions/omissions other than firing a round e.g. failure to adhere to category requirements.

Progressive Penalty - Procedural for the first infraction, Stage Disqualification for the second infraction, Match Disqualification for the third infraction. Example: failure to adhere to category requirements.

Reshoot – score recorded, the competitor starts over clean, carrying accrued safety penalties. Both scores turned in.

Restart – no recorded score, shooter is given a clean restart.

Shooting string – shots completed from one firearm prior to use of the next firearm.

Stage – synonymous with “Course of Fire” from the beep of the timer once the shooter has signified “ready” to the last shot fired.

Two handed shooting style – aka “Traditional” or - shooter holds a single revolver with two hands.

Up range – 180 degrees from the shooter away from the targets of a stage.
